YES SIR.

I'M VERY SORRY.

SO TRY TO TURN THEM IN TOMORROW.

WELL YOU HAVE THEM AT HOME...

I'M SORRY SIR.

RIGHT,

[A disease in which a ball is ejected from the man's penis during ejaculation.]

English name: Acquired Ejaculation Opportunity Loss Syndrome

Japanese name: Kotensei Shasei Kikai Sonshitsu Shokogun

Also known as.. Rainbow balls

The A.E.O.L.S is known as "rainbow balls", because the number and colors of the balls ejected from the penis during ejaculation as it counts down to the red ball matches the seven colors of the rainbow

First symptoms start with the ejaculation of a violet colored ball followed by the release of Indigo, blue, green, yellow, and orange colored balls, until finally, a red ball is released.

After the red ball is released, the patient will never be able to ejaculate again, and loses his reproductive functions.

15

SO WHAT ABOUT IT.

THAT HAS NOTHING TO DO WITH YOU.

16

ISN'T THAT ENOUGH FOR ME TO GET PISSED OFF?
